Foreword

The Selous Game Reserve and its neighbourhood are the focus of considerable conservation and development efforts. The reserve itself is one of the largest protected wilderness areas in the world and offers only limited access for wildlife viewing and controlled hunting tourism. Declared a World Heritage Site under the World Heritage Convention, the reserve is surrounded by large areas of sparsely settled bush with some subsistence cultivation. These peripheral lands are increasingly the subject of efforts to reconcile the conflicting interests of subsistence cultivators and the wildlife alongside which they live.

The level of interest in the Selous and its recent development made it useful to compile a list of all literature that relates to the Selous Game Reserve and its environs and to update it. Considering the nature of the area's recent history, it is not surprising that much of the literature is in the form of unpublished Government typescript reports and memos, or unpublished papers by other agencies.

There is also a variety of literature stretching back to the nineteenth century, which relates to the area now covered by Selous Game Reserve and its bufferzones. We have included books, articles in scientific and other journals and magazines, grey literature and important typescripts, but no newspaper articles.

The main objective of compiling this bibliography is to remove the necessity of laborious literature searches. The bibliography may also be of interest to the more serious tourist and nature lover. We have tried to check as many works as possible ourselves, in order to make sure that they are, in fact, of relevance to the Selous Game Reserve. We are aware of the fact that not all bibliographical data are totally complete. This was, however, unavoidable, as not every title was accessible in the original. As this list is certainly incomplete, the authors would be pleased to learn of any omissions or additions.

For this 2005 revision I have updated and extended the first and second bibliographies, which were published as SCP Discussion Paper No. 17 in 1994 and as Tanzania Wildlife Discussion Paper No. 28 in 2001. All new entries are marked after the author's name with *. I thank Philbert M. Ngoti for typing the additions.

This bibliography can be accessed through www.wildlife-programme.gtz.de/wildlife
